A & D Environmental to Exhibit at Upcoming Conferences

A&D is excited to be on the exhibitor list for the upcoming Carolinas Air Pollution Control Association (CAPCA) fall conference at The Hilton in Myrtle Beach, SC on Oct 17-19, 2012. This conference is very well attended and we encourage you to join us there. We also plan to host an afterhours social event during the conference, so stay tuned for details!

Additionally, this week, look for our very own Scott Pearce in Denver, CO at this year's Envirofest Conference being put on by the Rocky Mountain Association of Environmental Professionals to be held at Geotech Environmental Equipment's Denver office.

Did you Know?

Did you know that A&D Environmental has an office in Windsor, Colorado? It's true; our customers in Colorado and surrounding states can access our company's services by contacting us at 970-989-9411. Pictured is a recent addition to our Colorado capabilities, that being a vehicle equipped to perform Air Knifing (aka Potholing) enabling us to, among other things, locate underground utilities for our customers and excavate around them without causing damage and costly repairs.

Focus on the Employee

This edition focuses not on one employee, but on the A&D Environmental sales and project management team. On a Saturday following a recent sales meeting, A&D held a team appreciation/team building event at the US National Whitewater Center in Charlotte, NC. While the picture shows one of the crews looking like they conquered the course, these guys actually spent more time out of the boat than in. The guides led us safely through the various courses, but of course from our standpoint, we all "risked life and limb" throughout the entire course...at least that's what we told our families and friends 😊.

Customer Testimonial

The following quote is an excerpt from a note received by A&D's VP of Sales from a valued customer *"(Our company has)... a long history with the former Greenleaf Environmental and now A&D Environmental. All my environmental staff plus myself would like to commend and acknowledge A&D's Celeste Rodgers of your Buford (GA) office for being a "God Send" to us when we have any issues with Hazardous and Non Hazardous wastes. She makes our lives easier, more tolerable and all with a courteous smile. I personally, and on behalf of the \$1.6 Billion Company I represent, want to express my gratitude for Celeste and hopefully your Company can also recognize her on my behalf. It is people who make a company marketable and successful. Please accept my regards and admiration for this young lady..."* A&D Environmental appreciates all of its employees and is especially appreciative of Celeste's hard work in Georgia.

A & D Environmental Announces Addition to its Project Management Staff

We are proud to announce that we have strengthened our already strong project management team with the addition of Drew Higgins. Drew comes to us from Portland, Oregon where he was working as a senior project manager for another company in the industry. Drew has been in the environmental business for over 12 years and has a degree in Environmental Science from the University of Oregon. His experience includes expertise in hazardous and highly hazardous materials management, remediation, industrial services, as well as a high level of expertise in dealing with railroad emergencies. A&D welcomes Drew and his family to the Carolinas.

A & D Environmental Hosts Customer Event

A&D Environmental recently hosted several customers in the "Dugout" at a Greenville Drive minor league baseball game in Greenville, SC. The home team delivered a win and a great time was had by all. We will definitely do this (or something like it) again soon.
