## Safety!

A&D Environmental is committed to protecting the well being of its people, property, and the communities and environment in which we work. We are proud of our safety record and of the things we improve on each year to make A&D Environmental a safer company for our employees and our clients.

A&D Environmental has been audited and approved by many clients directly. In addition, A&D Environmental subscribes to third-party contractor management companies/programs like ISNetworld, PICS and BROWZ.

One of the elements of a successful safety program is training. We provide robust in-house training for our employees and seek to comply with all required training at our clients' sites. Many of our customers and prospects require that their vendors document very specific training. One such training course is the "Loss Prevention System" or "LPS" behavior based personnel training. A&D Environmental has recently put employees through the LPS training course in order to serve clients who requiring LPS training. In addition, we have been asked by some of our customers to put on training for their personnel.

If you have specific questions about health and safety programs at A&D Environmental please contact Paul Buttsavage, PE, CIH, A&D Environmental Corporate Health and Safety Officer at [pbuttsavage@adenviro.com](mailto:pbuttsavage@adenviro.com).

## Website Gets a Makeover

A&D Environmental's five core services (Industrial Services, Remediation, Waste Management, Transportation, and Emergency Response) are showcased on our new website. Not only that, but prospective employment candidates may apply for positions on-line, A&D Environmental's permits are listed there, you can download an electronic copy of our brochure, and you can request a quote. Visit us at [www.adenviro.com](http://www.adenviro.com).

## Company takes a vertical approach to its services

A&D Environmental has long been a valued source of technical expertise in its five core services. To keep up with the company's growth and to insure that we are providing top level service to customers throughout our system, we have recently developed a companywide vertical approach to implementation of those services. We've taken the employees with the most expertise in specific services and made them available to each of our business units, regardless of where they are located across the southeast. These employees apply their expertise in scoping and quoting industrial and remedial projects, finding homes for waste, overseeing projects, and generally improving our service delivery.

## A & D Environmental adds to it's resume

Those of you who have taken a peek at our "Permits and Licenses" section under "About Us" on the A&D Environmental website already know that our company has a broad spectrum of expertise. The Alabama General Contractors License is our most recent accomplishment. For those of you who need a licensed contractor to work for you in Alabama, A&D Environmental is now your "go to" company.

## Focus on the Employee

### Bill Aikins

In this edition, we will focus on A&D Environmental's South Carolina Proposal Development/Project Manager, Bill Aikins. Bill has been providing quality proposals and project management to our customers since he started with the company over 5 years ago. His background working in the remediation field and on DOE sites in the past makes him a perfect fit for our business in South Carolina. Bill is an integral part of our operations and we are grateful for his hard work. Bill and his family reside in South Carolina and, on a personal note, we recently congratulated Bill on the birth of a daughter. You may contact Bill @ 803-821-6021 or [baikins@adenviro.com](mailto:baikins@adenviro.com).

## Did you Know?

A&D Environmental has an office in Ft. Collins, Colorado. That's right, and we are expanding that office by pursuing remediation and industrial service work in Colorado and the surrounding states.

## Looking for an Environmental/Industrial Service Provider in the Shale Oil/Gas Production Areas?

Contact Scott Pearce (336-803-1783), [spearce@adenviro.com](mailto:spearce@adenviro.com) or Dan Martin (803-309-4657), [dmartin@adenviro.com](mailto:dmartin@adenviro.com).
